

INDUSTRIAL CABLE GRAB

STAINLESS STEEL

Industrial Cable Grabs are designed to provide fall protection for workers ascending or descending from a variety of vertical structures. Stainless steel construction allows unit to be durable, light weight and corrosion resistant.

Cable design provides hands-free operation by automatically following the user and allowing maximum freedom of movement. Detachable design allows the user to easily attach or remove the device anywhere along the 5/16" or 3/8" dia. 7x19 galvanized or stainless steel cable.

MATERIAL SPECIFICATIONS

TABLE 1: MATERIAL SPECIFICATIONS

CABLE GRAB	Stainless Steel
ATTACHMENTS	
WEB LANYARD	Polyester
SHOCK ABSORBER	Polyester
SNAP HOOK	Forged Alloy Steel Proof tested to 3,600 lbs. (16kN)

TECHNICAL SPECIFICATIONS

TABLE 2: TECHNICAL SPECIFICATIONS

	MIN. TENSILE STRENGTH
ROPE GRAB	3,600 lbs. (16kN)
SNAP HOOK	5,000 lbs. (27kN)
LANYARD	5,000 lbs. (27kN)
SHOCK ABSORBER PEAK FORCE	900 lbs. (4kN)
MAX WORKING LOAD	310 lbs. (141kg)

CERTIFICATIONS

Meets OSHA, ANSI Z359.1, A10-32 requirements.
