

NYLON SCREEN TUBE

Nylon Screen Tubes

Nylon Screen Tubes are used to prevent waste of epoxy adhesive in hollow base materials. The epoxy adhesive is injected into the screen tube once it is placed within the hole, this ensures the epoxy forms a mass around the outside of the screen tube making the pull out value's far higher than injecting straight into a hole without the screen tube.

Suitable for use in:

- Hollow brick
- Terracotta
- CMU block
- Hollow core type concrete material

SPECIFICATIONS

Part No.	Size	Anchor Diameter	Anchor Length Overall	Drill Diameter	
1NST38600	3/8 x 6 Nylon Screen Tube	3/8"	6"	9/16"	25
1NST38800	3/8 x 8 Nylon Screen Tube	3/8"	8"	9/16"	25
