## FICEP PLATE PROCESSING TABLE

10' X 40' CAPACITY

DRILLING, BEVELING, SCRIBING, HD PLASMA & OXY CUTTING

Our **Ficep Kronos Burn Table** has the capability of handling up to 6" thick material with maximum size range of 10' wide to 40' long. The Ficep Kronos integrates all the cutting and marking processes into one single operation to reduce material handling cost. The plasma cutting feature cuts up to 2" thick plate, while the Oxy Fuel feature cuts up to 6" thick plate and has a 2" diameter drilling capacity.

## PEDDINGHAUS CNC & FLAT BAR PROCESSOR

40' LENGTH & 6X6" ANGLE CAPACITY

PUNCHING, DRILLING & SHEARING

Allfasteners' **CNC Angle & Flat Bar Processor** can not only punch square, round or standard slots into material but can also drill holes up to 1-5/8" diameter. This machine can handle any angle or flat bar material up to L6x6x1/2 x 40' and the automated feed allows for ease of material handling and high volume projects

## FICEP EXCALIBUR 12 BEAM DRILL

84' LENGTH CAPACITY

DRILLING, MILLING & TAPPING

One of the first machines Allfasteners obtained was our **Ficep Excalibur 12 Beam Drill**. This CNC beam drill can handle a large array of materials including Beam, Channel, Flat Bar and Tubing up to 36' with precision and accuracy. Drilling capability includes holes up to 2-1/2" diameter with a maximum material length of 84'.

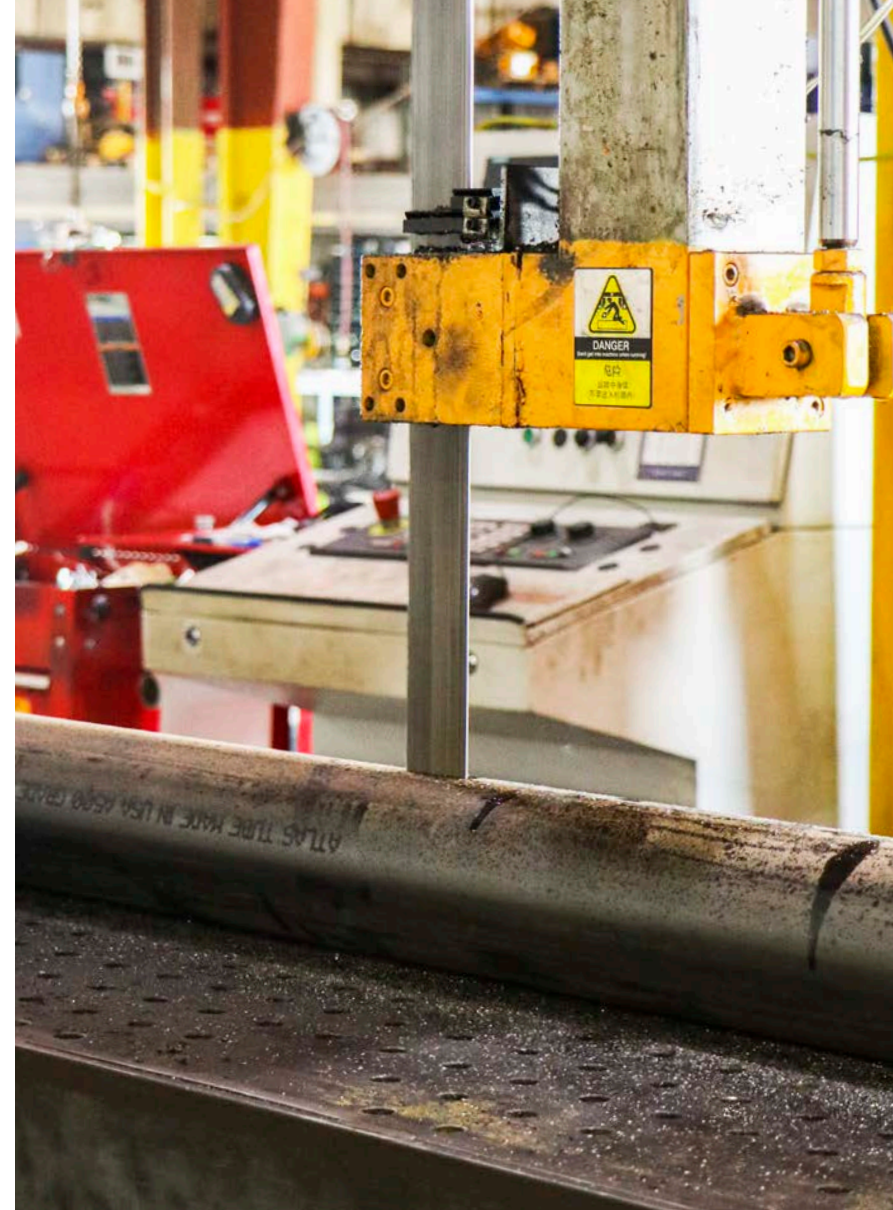

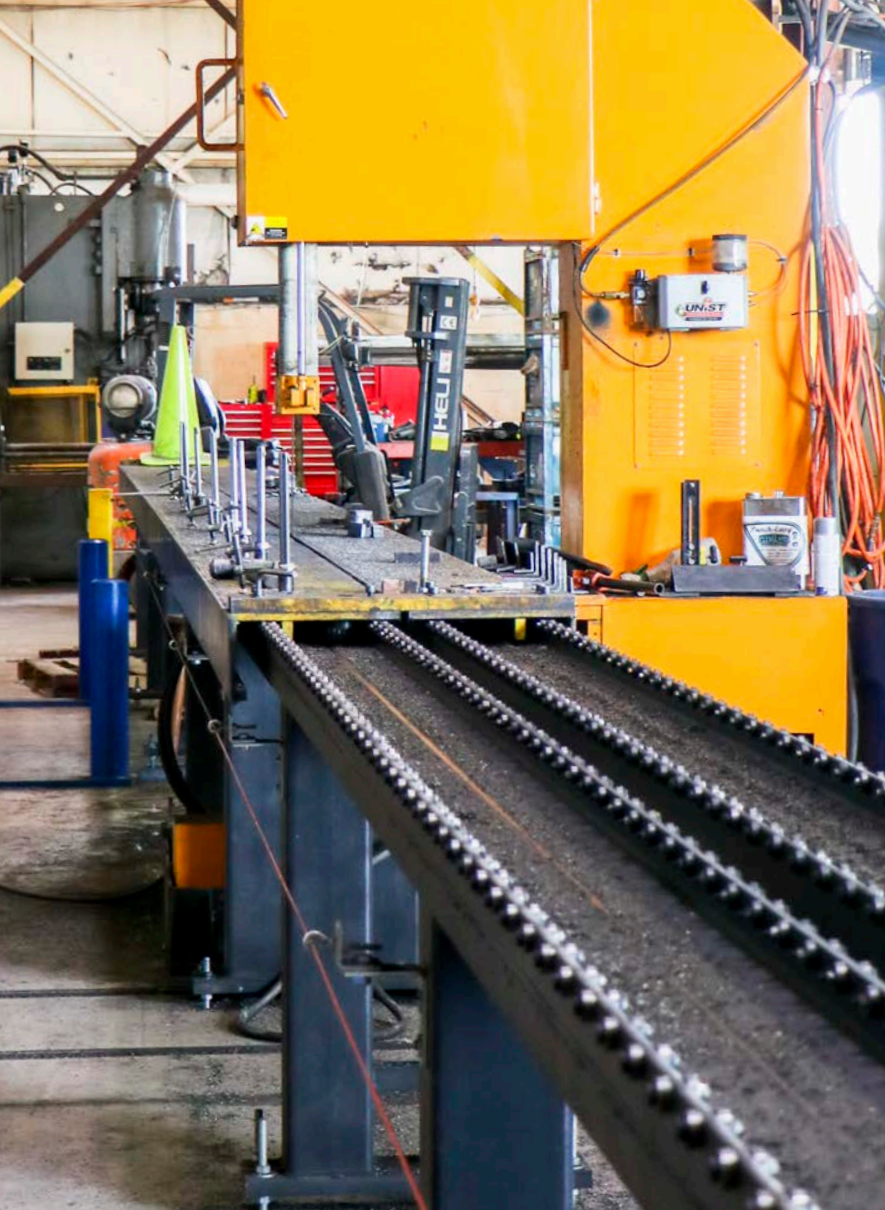

## **RIPPING SAW**

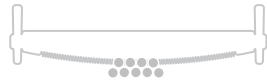

40' LENGTH CAPACITY

SPLITTING/SAWING

This machine has a 40' length capacity and is ideal for splitting pipe, tube or solid stock. Overall capacity of ripping saw is 40' x 30" x 24".

**BAND SAW**  
LARGE CAPACITY  
MITERING

One of two Allfasteners' standard band saws, this **Beka-Mak BMSY 440 DGH Band Saw** is a large capacity CNC Mitering bandsaw with a 1-1/4" blade ideal for cutting pipe (as shown). With features such as hydraulic clamping, readable mobile control panel, adjustable belt and sensitive cutting pressure, this saw produces accurate and precise cuts.

## CNC BAND SAW

LARGE CAPACITY

BUNDLE CUTTING

The second of our in-house band saws is a **Beka-Mak BMSO 325CH CNC Bandsaw**. Ideal for bundle cutting, this fully automatic band saw is typically used for high-volume repetitive cutting of solid stocks, tubes and profiles of steel, cast-iron light and nonferrous material.

## LEMAS PLATE ROLLER

8' LENGTH CAPACITY

Our large capacity **Lemas Plate Roller**. Built with a combination of planetary gear boxes and hydraulic motors that provide superior torque, speed and distribution, this plate roller can bend and roll the toughest of materials with a 5/16" x 8' sheet capacity.

## CNC IRON WORKER

90 TON

CROPPING, SHEARING & PUNCHING

Allfasteners' fully integrated CNC Iron Worker has an X & Y positioning table that allows for high volume, accurate, and repetitive cropping and punching of materials. Along with CNC cropping and punching, our Iron Worker has a 4" shearing capability.

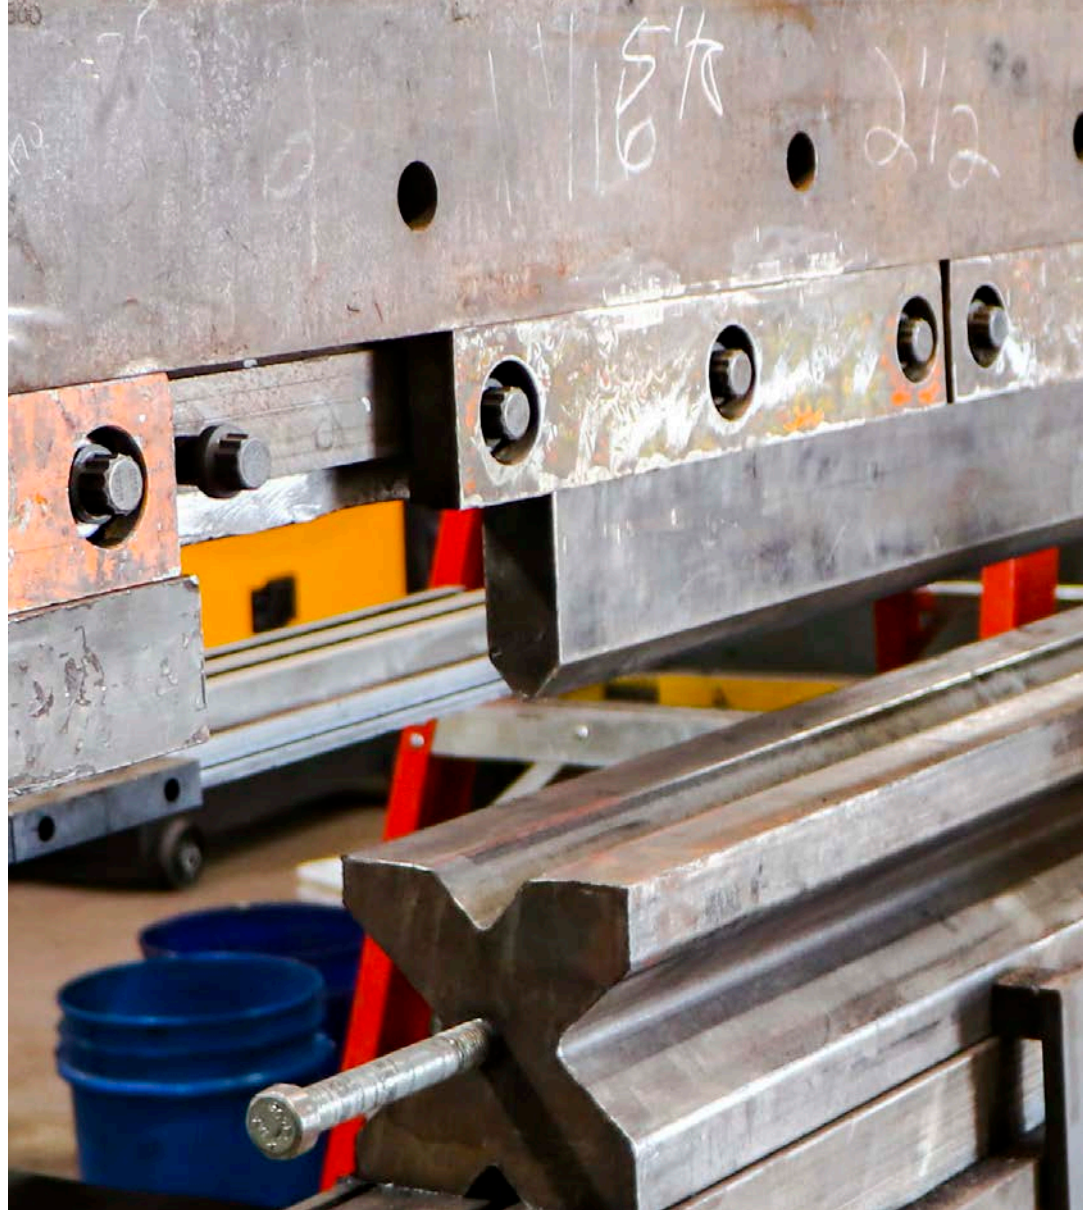

## **PRESS BRAKE - 300 TON**

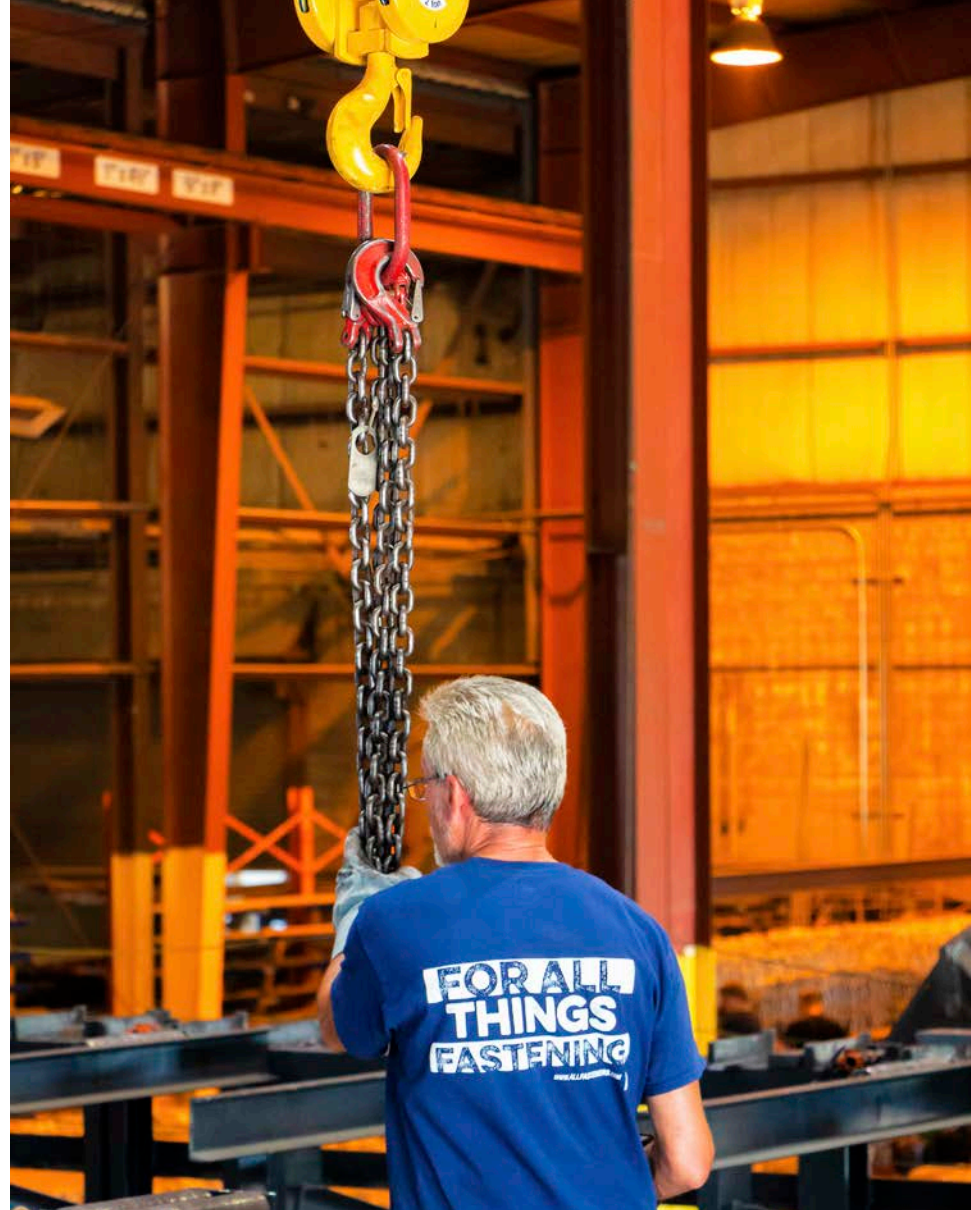

3/8" x 10' / 1-1/4" x 24" CAPACITY

PRESSING & BENDING

An original asset to the Allfasteners fabrication team, our **300 Ton Pacific Press Brake** allows for bending sheet and plate materials. Our press brake also comes with a CNC back gauge to help execute jobs with robustness, accuracy and speed.

## MATERIAL HANDLING

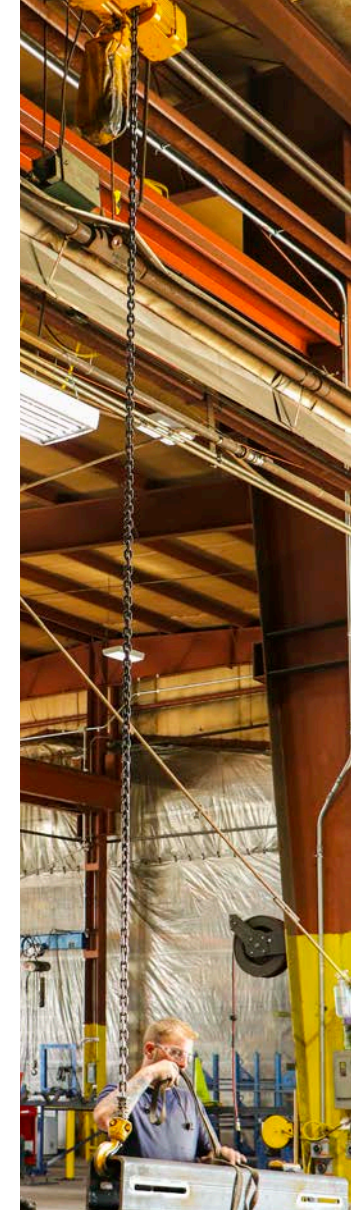

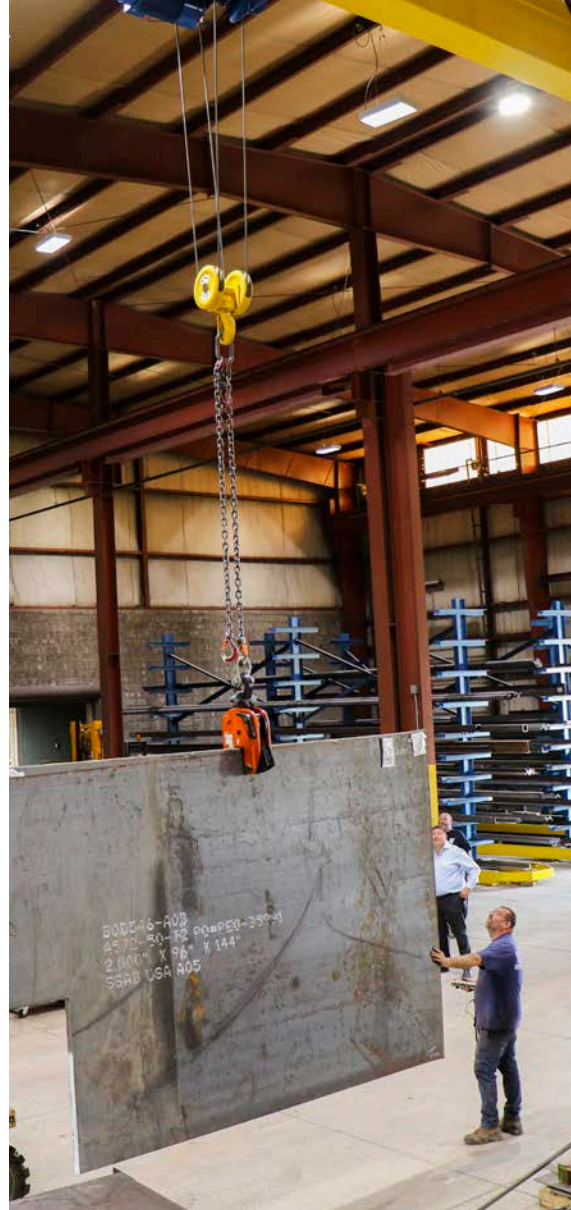

### 7 OVERHEAD CRANES

All of our overhead cranes here at Allfasteners have wireless remote controls for easy and safe operator control.

(3) - 2 TON OVERHEAD CRANES - 25' X 225'

(2) - 10 TON OVERHEAD CRANES - 45' X 225'

(1) - 20 TON OVERHEAD CRANE - 45' X 225'

## WELDING

AWS D1.1 & D1.5 CERTIFIED WELDERS

+ ONSITE CERTIFIED WELDING INSPECTOR (CWI)

Allfasteners is proud to employ a skilled, talented and devoted team of welders, machinists, inspectors and jack-of-all-trade workers. From standard turn-of-the-mill pieces to innovative solutions for any application, no project is too complex for our team to master. Along with our skilled team members, AF houses high-tech, top of the line machinery to help our team get the job done - to specifications, in an efficient time frame.

(1) T800 KENWORTH DAY CAB CAT 500HP

(5) F350 PICK-UP TRUCKS WITH GOOSENECK TRAILERS

Allfasteners prides itself on our growing delivery fleet and our capability to delivery anywhere in the USA with ease and efficiency. To aid in ease of delivery, loading and unloading, Allfasteners has the ability to bring machinery such as forklifts and telehandlers where crane access is not available. We also take pride in our experienced delivery staff who can handle any issue, are personable upon arrival and will provide hands on help while on site.
